OBJECTIVE

Seeking a graduate internship opportunity where I can learn new skills, apply my skills in web design, UX and systems architecture to contribute to real-world software projects, while growing in my field through mentorship and exposure to production-scale systems.

EDUCATION

UNIVERSITY OF PRETORIA
Currently completing a BSc in Computer Science (3rd year)

JEPPE HIGH SCHOOL FOR GIRLS
Matriculated in 2022

TECHNICAL SKILLS

- **Languages:** C++, Java & Python
- **Web & Data:** HTML, CSS, JavaScript, React & PostgreSQL
- **Additional:** Word, PowerPoint, Excel, Figma design & Canva
- **Tools:** Docker, Git and GitHub actions

Diya Narotam

STUDENT

3rd year computer science student with a passion for web design, user experience and system architecture. Combines strong frontend development skills with growing backend and systems knowledge. Enjoys building intuitive, well-architected products and is driven by curiosity for how good design and solid engineering come together.

EXPERIENCE

CSIR STUDENT CLUSTER COMPETITION NATIONAL ROUND
Jun 2026 - Dec 2026

Participating in the National round of the SCC HPC, competing against top-performing students from across South Africa, after participating in a weeklong bootcamp at Stellenbosch University. Applied programming, algorithmic problem solving and engaging with server grade hardware and software components.

SANREN CYBER SECURITY CHALLENGE SANREN / CSIR
Sept 2026

Competed in the qualifier round with various problem-solving challenges relating to web exploitation, cryptography, digital forensics and OSINT while developing practical and ethical cybersecurity skills.

ENTELECT UNIVERSITY CUP HACKATON ENTELECT
Aug 2026

Placed 68th out of 200 teams in a timed optimization challenge, collaborating with a small team implementing a city builder optimization search algorithm to maximize resource returns.

PROJECTS

GESTURE BASED DRONE CONTROL CAPSTONE (UP)
Feb 2026 - Nov 2026

Developed a gesture-controlled flight system for drones, enabling real-time hand gesture recognition to translation into flight commands. Worked primarily as a frontend developer using React and JavaScript, with some backend development in Python, integrating a computer vision pipeline built with MediaPipe for gesture detection. Contributed to usability testing to refine the user's overall experience.

ACCOMPLISHMENTS

RUTH FIRST FULL ACADEMIC SCHOLARSHIP FOUNDATION
Jan 2018 - Nov 2022

1ST PRIZE IN CODE KAMOSO CODING HACKATHON
Jun 2021
